

KOMODO DRAGONS

Komodo Dragons have 60 large shark like teeth.

Its maximum speed is 11 miles per hour.

They weigh 75 kg and they live in a few Indeonisa Islands.

They can kill water buffaloes, eat children and are immune to bullets.
(Ok I made the last bit up.)

Komodo Dragons can live for up to 30 years!

They have a yellow tongue and its poisonous.

Their length is roughly 2.6 m (Male adult), 2.3 m (Female adult).

Komodo dragons eat almost any type of meat. They enjoy scavenging for carcasses or stalking animals that range in size from small rodents to giant mammals.

We live in dry open grasslands savanas and tropical forests.
